

Base Extension

Compatible with operator models:

SlideDriver 15 • SlideDriver 30F • SlideDriver 40 • SlideDriver 50VF2/3 • SlideDriver 80

Raise the SlideDriver operator 12 inches for additional conduit accessibility and operator flexibility

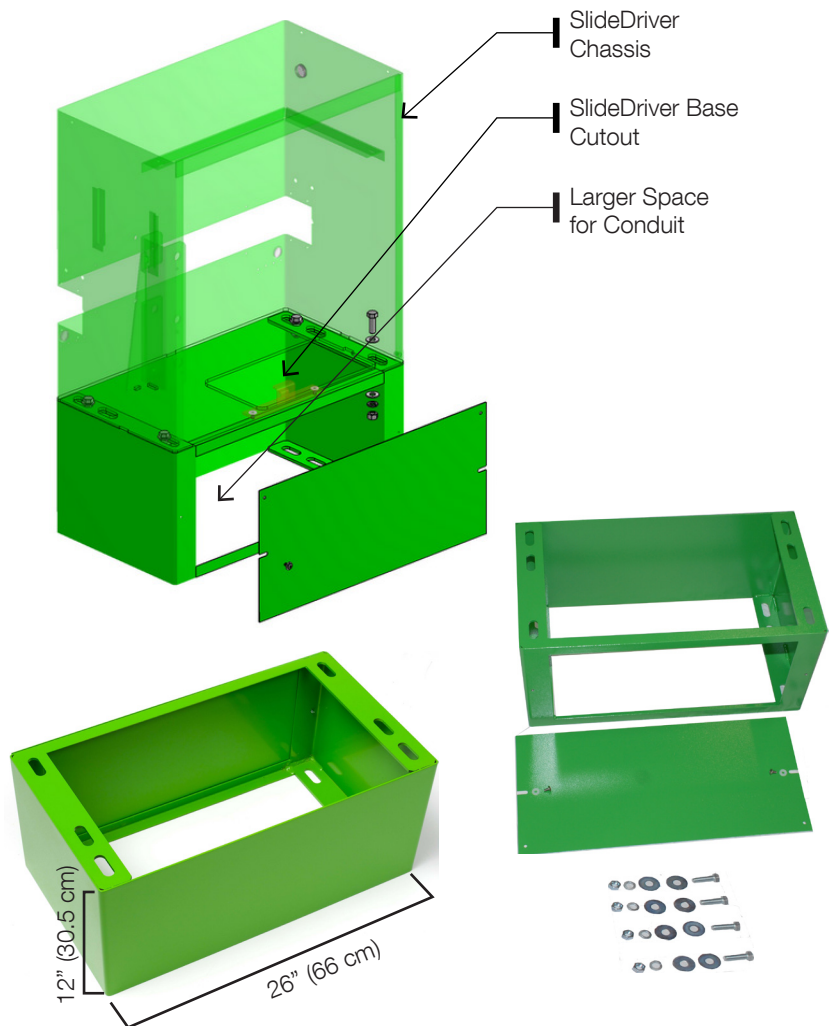

Conduit can often be set in the concrete base pad without consideration of the SlideDriver base cutout location. The Base Extension compensates for this type of issue by providing a much larger opening while raising the SlideDriver an additional 12 inches (30.5 cm) to help protect the internal components against water, snow or sand buildup.

Easily installs underneath SlideDriver

- Secures to the base of the operator using four cap screws
- Raises operator 12 inches (30.5 cm) for improved access to internal components
- Provides additional drive rail height for custom site specifications
- Elevates the internal components out of depressions where water, snow or sand buildup is a concern
- Weighs 52 lbs (23.6 kg) total

SlideDriver Base Extension Kit includes:

- Base Extension
- Cover to the Base Extension
- Hardware to attach the cover to the Base Extension
- Hardware to attach the SlideDriver chassis to the Base Extension

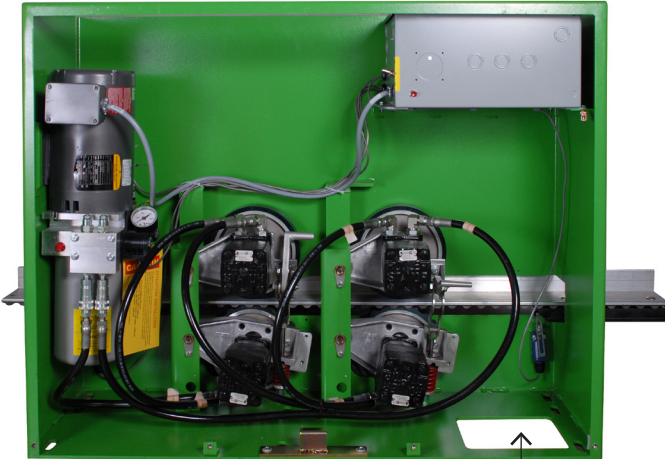

PART NUMBER	DESCRIPTION
MX001033	Green
MX002618	Custom Color

MX002620	Galvanized
MX002613	Stainless Steel

Base Extension 200

Compatible only with SlideDriver 200

SlideDriver 200
base cutout

Raise the SlideDriver 200 operator 12 inches for additional conduit accessibility and operator flexibility

The 200 model is the largest of the SlideDriver operator series built and manufactured by HySecurity. Conduit can often be set in the concrete base pad without consideration of the SlideDriver 200 base cutout location. The Base Extension compensates for this type of issue by providing a much larger opening while raising the SlideDriver 200 an additional 12 inches (30.5 cm) to help protect the internal components against water, snow or sand buildup.
