

TECHNICAL BULLETIN

BCU1 Controller Firmware Release: HE03E

OPERATORS: BCU1 Controller (used in M-Bar / L-Bar R10)

DATE: 12/08/2020

SUBJECT: New Firmware Release **he03e** (Filename: **HE03E.hex**)

SUBJECT DESCRIPTION:

New firmware revision has been released for the BCU1 controller used in the M-Bar and L-Bar R10 operators.

IMPLEMENTATION DATE:

11/23/2020. The production date can be identified by checking the external sticker on the packaging.

IMPACT:

Bug fixes. This update is recommended for any units not yet installed or installed units experiencing issues.

Issues Fixed: Several minor functionality issues and bugs have been corrected, especially concerning dual barrier systems.

Firmware Update Requirements:

- Oview with Bluetooth module (OVBT) attached to controller
- IBT4N interface
- PC with the Oview software for the updating process.

Before performing the update, remove the radio receiver from the control unit. After the update, it is recommended to erase the memory.

NOTICE

Refer to the nice M-Bar / L-Bar R10 installation reference manual (P/N D1036) for information on the installation and operation of the Oview module/software and IBT4N interface cable used in the update procedure. The firmware download link is below.
