

Product Bulletin:
ON2E/A Update for OXI Radio in Residential Gate Products

Nice North America announces an update to ON2E/A transmitter availability.

Table 1. ON2E/A Milestones and Dates:

Milestone	Definition	Date
Product Bulletin Date	The date the product bulletin document is distributed to the general public.	July 13, 2026
ON2E/A SKU status changed from “Discontinued” to “Active”	The date the ON2E/A transmitter will be an active SKU.	Effective immediately

Table 2. Product Part Numbers Affected by This Announcement:

Product Part Number	Product Description
ON2E/A transmitter	2-button 433.92 MHz transmitter compatible with OXIBD/A and 318N radio receivers

Reason for Change:

In January 2026, Nice announced the radio protocol for residential gate products change from the 433.92 MHz OXIBD/A receiver and ON2E/A transmitter to the 318 MHz OXIMGC/A receiver and MTS3 transmitter. With the announcement came discontinuation of related OXI accessories, including the ON2E/A transmitter. Inventory was depleted faster than anticipated and Nice understands there are thousands of OXI radios in the field. The ON2E/A transmitter will remain an active SKU to support replacement sales.

Important Notes:

- a. Nice will continue to sell the 318N receiver, OXIBD/A receiver, ON2E/A transmitter and EDSWG/A keypad. The colored INTI transmitters (INTI2/A, INTI2B/A, INTI2L/A, INTI2R/A, INTI2Y/A) will remain discontinued products. ON4E/A will be available until inventory is depleted.
- b. Nice will continue to sell the OXILR/A receiver, ON3ELR/A transmitters and ONELRKIT/A kit for customers looking for longer range, higher security and bidirectionality. Please note that this receiver is not compatible with HomeLink.
- c. If you have any questions about this Product Bulletin, please contact your Nice Sales or Support Representative.

Thank you for your continued business.
